EXCENTER EXCELLENCE!

**FLAT. MODULAR. MOBILE.
THE COLUMBUS AMONG THE
EXCENTER MACHINES.**

columbus

REDEFINING THE EXCENTER MACHINES.

**MAXIMUM COMFORT. HIGHEST QUALITY.
THE X 500 EXCENTER SERIES.**

Easy operation, fast working speed, effortless cleaning close to the edge - our X 500 models offer all the typical excenter advantages. But at the same time they offer so much more. With unique features and the highest quality, they set completely new standards and prove to be what they are: the columbus among excenter machines!

X 500|S

X 500

COMFORTABLE & USER-FRIENDLY

Built to be ergonomic, silent and low in vibration, our X 500 models provide accuracy that is amazingly easy to accomplish and easy to operate. On top, the X 500|S model in particular impresses with many innovative features that radically simplify the often difficult transport of the machine.

ROBUST & DURABLE

No matter which of our two excenter machines you choose: As always, columbus stands for extremely robust construction, high-quality materials, first-class engineering, reliable technology and, all in all, a long service life. Unique quality „Made in Germany“.

COST EFFECTIVE & LONG LASTING

Both models score in terms of cost-effectiveness: the X 500 model as a very attractively priced entry-level variant that nevertheless masters all the typical excenter advantages to perfection. The X 500|S model, on the other hand, is a mobile trouble-shooter that fits easily into any car thanks to its extremely modular design.

ONLY 240 MM UNDERCLEARANCE

EXTREME LOW-PROFILE

The extreme low-profile design of our X 500|S model is an absolutely unique selling point. An incredible 240 mm underclearance means less time consuming moving around, repositioning of objects and follow-up work. In other words: More efficiency and profitability.

CONVENIENT & TOOL-FREE

QUICK CLAMPING SYSTEM

Incredibly simple! With the patent-pending quick-clamping system, the machine can be dismantled and the weights removed and attached without tools. The weights increase the pressure by 15 kg.

LESS THAN 35 KG LIFTING LOAD

EASY TRANSPORT

„The most transport-friendly excenter machine on the market!“ The X 500|S model lives up to this claim in several ways: on the one hand, the machine body and chassis can be separated without tools and transported individually. On the other hand, the levers of the quick-clamping system can also be used as comfortable carrying handles to transport the remaining lifting load of less than 35 kg.

REINFORCED POWER CORD
ADJUSTABLE
GUIDE BAR

The ergonomic guide bar on both models is individually adjustable to the user and can be locked in all positions. The mains cable in bright red is made of robust PU, which effectively protects the internal cables from damage.

CLEAN CLOSE TO THE EDGE
PERFECT
INTO THE CORNER

With their angular pads, our X 500 models get into every corner easily and thoroughly, helping to avoid time-consuming manual follow-up work.

PROTECTS MACHINE & ENVIRONMENT
SILICONE
BUMPER

The flexible and extremely tear-resistant silicone bumper provides optimum protection for the machine body as well as skirting boards and walls when working close to the edge. Another quality feature and unique selling point of our excenter series.

FLEXIBLE AND LONG-LASTING
INNOVATIVE
HOOK PLATE

Unlike rigid hook plates, our design is much more flexible. This gives the pad optimal support and ensures both comfort and ease of use.
